

HOOK

Stop the *Pre-9 AM ET* Handoff Headache.

Founders and ops leaders in US SaaS often face fragmented data and manual updates trying to get ready for morning standups. This leads to slow starts, missed context, and wasted time before the day even truly begins.

1 Fragmented data across tools

2 Manual updates for standup

3 Missed context for reps

01

Before: *15 hrs/week* on Manual Sales Prep.

Imagine your SDRs manually sifting through LinkedIn, HubSpot, and company sites for discovery call prep. This often means crucial context is missing or incomplete for the rep before their 9 AM ET call, leading to wasted time during handoffs.

1 Prospect research across 3+ tabs

2 Inconsistent discovery notes

3 Reps arrive unprepared

02

After: *AI-Powered Briefs* to Slack.

I built an automation that uses Calendly webhooks to trigger Apollo enrichment and Gemini API summarization. Before your rep's 9 AM ET call, a concise, actionable brief lands directly in their Slack, ready for standup review.

1 Calendly webhooks trigger flow

2 Apollo + site scrape data

3 AI-drafted talking points in Slack

03

Before: *45 Mins* of Post-Contract Chaos.

After a DocuSign contract, customer success teams in US SaaS manually create Slack channels, provision database access, and update HubSpot. This manual handoff is prone to errors and delays client activation before the 9 AM ET review.

1 Manual Slack channel creation

2 PostgreSQL tenant provisioning

3 HubSpot deal term updates

04

After: *Instant Client Provisioning* & Handoff.

With DocuSign Connect webhooks, I built a Python FastAPI worker that extracts contract details, provisions PostgreSQL tenants, and updates HubSpot automatically. This ensures all new client data is ready before your 9 AM ET standup, reducing errors.

1 DocuSign webhooks trigger flow

2 AI extracts contract details

3 Auto-provisioning & HubSpot update

Want this on *your* stack?

Comment AUTO or DM AUTO. I will suggest 3 automations for your CRM + chat + project tools that can eliminate pre-9 AM ET handoff chaos.

1 Free 15-min audit

2 Fixed-price builds
