

HOOK

Stop *Wasting* Hours on Manual SaaS Handoffs

US SaaS companies often bottleneck at critical data transfer points, costing thousands in lost productivity. I build custom automations that eliminate these pains, freeing your team to focus on core revenue-generating activities.

1 Identify high-impact operational inefficiencies

2 Automate workflows Zapier can't handle

3 Guarantee fixed-price, production-ready solutions

01

15–Minute Audit: *Pinpoint* Your Bottlenecks

We start with a quick, focused call to understand your existing tech stack and the specific pain points costing your team time. This isn't a sales pitch; it's a deep dive into your HubSpot, Salesforce, Stripe, or DocuSign workflows.

1 Identify 3–5 high-ROI automation candidates

2 Map current manual processes

3 Prioritize based on impact and complexity

02

Blueprint Automation: *Code-First* Design

Based on our audit, I design a custom solution using Node.js, Python, and relevant APIs like HubSpot, Calendly, or Slack. We outline data flows, API calls, and the exact steps the AI will perform, ensuring alignment.

1 Detailed solution architecture

2 API integration strategy (webhooks, REST)

3 High-level system design with LLMs

03

Full-Stack Build: *Robust* & Scalable

I develop the full automation, including any necessary dashboards or admin panels using Next.js. My builds are designed for reliability, audit trails, and future scalability, ready for your Series A growth.

1 Next.js, Node.js, Python development

2 PostgreSQL for data persistence

3 Thorough unit and integration testing

04

Deploy & Tune: *Production-Ready* Ops

Once built, we deploy the automation, often on serverless infrastructure, and rigorously test it in your environment. I then fine-tune prompts for AI agents and ensure smooth, reliable operation before handover and documentation.

1 Secure deployment strategy

2 Monitor and optimize performance

3 Comprehensive documentation & support

Want this on *your* stack?

Comment AUTO or DM AUTO. I will suggest 3 automations for your CRM + chat + project tools. Stop losing hours to manual ops and start seeing real ROI today.

1 Free 15-min audit

2 Fixed-price builds
