

HOOK

SDRs waste *15 hours* researching before demos?

Your sales development reps are likely spending a huge chunk of their week on manual prospect research. This often leads to inconsistent discovery calls and missed opportunities for your US SaaS.

1 Inconsistent discovery notes

2 Low rep efficiency

3 Missed pain points

01

Calendly Booked? Trigger *Instant* Research.

The moment a prospect books a demo via Calendly, a webhook fires off to my custom Node.js backend. This kicks off the entire automation without any manual input, ensuring speed and reliability.

1 Calendly webhook listener

2 Node.js backend processing

3 Immediate trigger, zero delay

02

Apollo API + Web Scrape for *Deep* Insights.

First, I use the Apollo enrichment API to pull in crucial company data like industry, size, and tech stack. Then, a Puppeteer script scrapes their public website for recent news, product launches, or specific problem statements relevant to your offering.

1 Apollo API data enrichment

2 Puppeteer for targeted web scraping

3 Comprehensive company profile

03

Gemini AI Drafts Your *Key* Talking Points.

All the gathered data is fed into the Gemini API. My custom agent analyzes this information and drafts 3 hyper-relevant talking points and potential pain points. This gives your SDR a massive head start on discovery.

1 Gemini API for analysis

2 Custom prompt engineering

3 3 tailored talking points

04

Slack Briefing: *10 Mins* Before the Call.

The final, structured brief – complete with talking points and prospect insights – is posted directly to your SDR's Slack channel exactly 10 minutes before the demo. No more scrambling; they're prepped before their 9 AM ET standup.

1 Structured Slack message format

2 Timed delivery via Slack API

3 Reps always pre-call ready

Want this on *your* stack?

Comment AUTO or DM AUTO. I will suggest 3 automations for your CRM + chat + project tools.

1 Free 15-min audit

2 Fixed-price builds
