

STEAL THIS

Automate your *DocuSign to Stripe* pipeline

Stop manually provisioning databases and billing setups. Set up a secure API bridge.

01

Catch the *DocuSign* webhook

Configure DocuSign Connect to fire a secure webhook to your backend API the second a contract is fully executed.

02

Extract key *metadata parameters*

Use a Node.js parser to pull specific fields like seat count, contract value, and custom SLA tiers from the signed document.

03

Provision Postgres and *Stripe billing*

Trigger multi-tenant database migrations automatically and call the Stripe API to initiate the correct recurring billing schedule.

04

Update HubSpot and *Slack*

Instantly move the CRM deal to Closed-Won and post a clean onboarding brief in Slack for your customer success team.

Want this on *your* stack?

Comment AUTO or DM AUTO and I will suggest 3 automations.

Comment *AUTO* to start.
