

HOOK

The 5-Step US SaaS *Automation Audit*

Stop letting manual data entry and broken webhooks drain your team's daily productivity.

01

Check your lead-to-CRM latency

Does a Calendly booking sync with HubSpot in under 10 seconds? If not, you are losing hot prospects.

02

Review your post-sale setup

Are you still manually provisioning database tenants and Slack channels after a DocuSign contract is signed?

03

Check for silent API failures

Do you have a dedicated Slack channel or alerting system that pings your team the moment a webhook fails?

04

Measure your team's prep time

If your SDRs spend more than 5 minutes digging through 4 tabs before a demo, your CRM enrichment is broken.

Want this on *your* stack?

Comment AUTO or DM AUTO and I will suggest 3 custom automations to fix these exact gaps.

Comment *AUTO* to start.
