

THE PROBLEM

Why your reps fly *blind* into demos

Reps spend 20 minutes copying data from LinkedIn and HubSpot into Google Docs. It ruins their flow.

01

Capture the Calendly *trigger*

A custom webhook fires the moment a prospect books. We extract their corporate email domain immediately.

02

Enrich with *Apollo*

A Node.js worker queries Apollo to pull employee count, current tech stack, and funding stage.

03

Synthesize pain points using *LLMs*

Gemini analyzes their website and matches it with your product capabilities to draft 3 custom talking points.

04

Deliver straight to *Slack*

A structured brief is pushed to the rep's dedicated channel 10 minutes before the call starts.

Want this on *your* stack?

Comment AUTO or DM AUTO and I will suggest 3 automations.

Comment *AUTO* to start.
